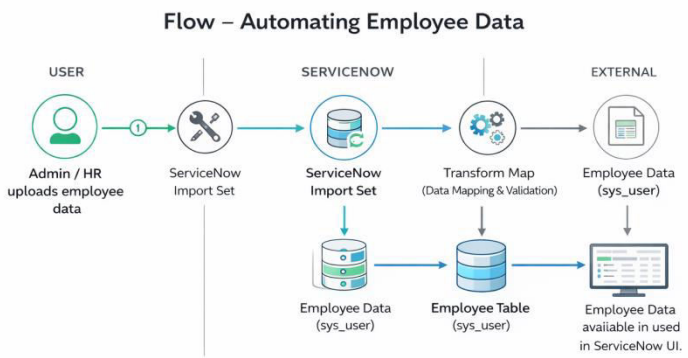
Project Design Phase-II
Data Flow Diagram & User Stories

Date	5 April 2026
Team ID	SWTID-2026-9677
Project Name	Automating employee data
Maximum Marks	4 Marks

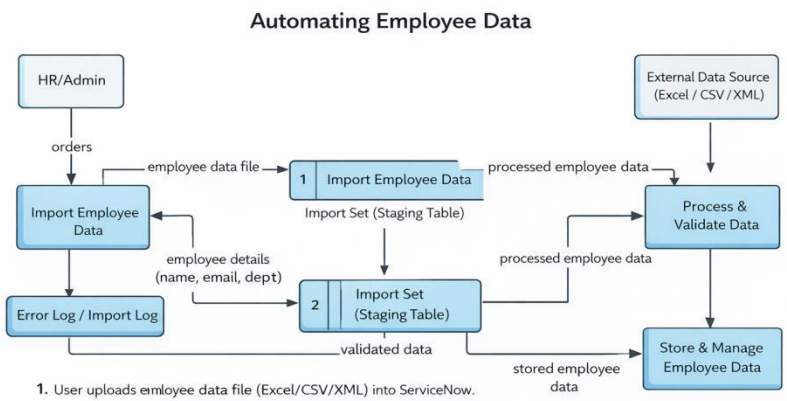
Data Flow Diagrams:

The DFD shows how employee data moves in the system. Employee details from external files (Excel/CSV/XML) are uploaded into ServiceNow using Import Sets. The data is stored in a staging table, validated, and then transformed using Transform Maps. Finally, the data is stored in the main employee table (sys_user) for easy access and use.

Example:



1. User uploads employee data file (Excel/CSV/XML) into ServiceNow.
2. Import Set loads the data into a staging table.
3. Data is validated and processed using **Transform Maps**.
4. Transformed data is stored in the employee table (sys_user).
5. Employee data is displayed and used in ServiceNow applications.



1. User uploads employee data file (Excel/CSV/XML) into ServiceNow.
2. Import Set loads the data into a staging table.
3. Data is validated and processed using **Transform Maps**.
4. Transformed data is stored in the employee table (sys_user).
5. Employee data is displayed and used in ServiceNow applications.

User Stories

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Service Now Admin	Data Import Setup	USN-1	As a Service Now Admin, I want to upload employee data (CSV/XLSX) so that it can be stored in the system	File is uploaded successfully and data appears in import table	High	Sprint-1
ServiceNow Admin	Data Import Setup	USN-2	As an Admin, I want the system to automatically create an import table (import_employee)	import table is created with all uploaded records	High	Sprint-1
ServiceNow Admin	Data Transformation	USN-3	As an Admin, I want to create a Transform Map to move data from import table to user table	Transform map is created and linked to correct tables	High	Sprint-1
ServiceNow Admin	Data Transformation	USN-4	As an Admin, I want to map fields like Name, Email, Department, and Manager	All fields are correctly mapped without errors	High	Sprint-1
ServiceNow Admin	Data Validation	USN-5	As an Admin, I want to validate transformed data to ensure accuracy	Data is correctly inserted into sys_user table	High	Sprint-1
ServiceNow Admin	Error Handling	USN-6	As an Admin, I want the system to log errors for missing or incorrect data	Errors are logged without stopping the process	Medium	Sprint-2
ServiceNow Admin	Form Configuration	USN-7	As an Admin, I want to configure the Incident form to show employee details	Fields are added and visible on form	High	Sprint-2

IT Support Agent	Incident Management	USN-8	As an IT Support Agent, I want to see employee department on Incident form	Department auto-displays when user is selected	High	Sprint-2
